

The Mobility Factory SCE, a European co-operative enterprise

2nd of March of 2022

REScoop.eu and The Mobility Factory

► We need **actors at all levels** to make the energy transition succeed

► **Participation** by citizens fosters social acceptance for the energy transition

► The local level can be mobilised through **energy communities**

► **TMF** supports energy communities in taking on e-car sharing services

RESCOOP.EU

The Mobility Factory

The **Mobility Factory (TMF)** is a European Cooperative Society (SCE), founded in 2018 by eight cooperative enterprises and REScoop.eu.

- ▶ TMF offers a complete **software platform**.
- ▶ The platform is fully **customizable**.
- ▶ TMF members **co-own** the platform.
- ▶ TMF members **decide** on the platform.
- ▶ TMF provides the **space to empower collaboration** between it's members.

Success stories

Success story: Som Mobilitat

Catalunya, Spain

- ▶ Cooperative in Catalunya, 2500 members form local groups and are present in over 30 municipalities.
- ▶ SM operates a fleet of 60 shared electric cars applying the successful model of Som Energia to shared mobility

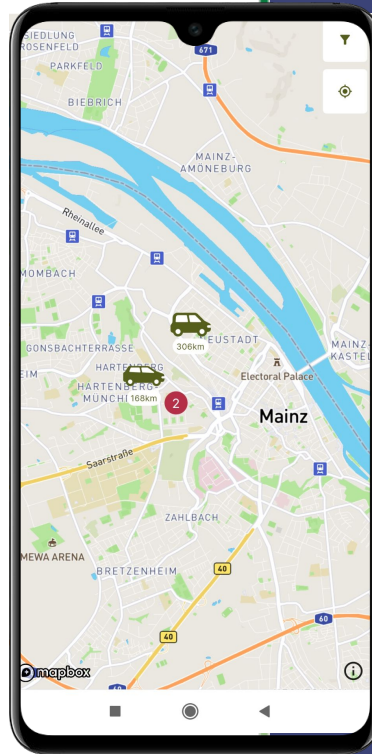

Success story: Vianova.coop

Mainz, Germany

► Vianova.coop is offering services to 23 member organisations.

► Focus on sustainable forms of mobility in community as an essential part of the transport turnaround.

TMF current and forecast situation

Inter-cooperative roaming

Logical step: Extend collaboration on operational level:

- ▶ We already share business knowledge between our members - we trust each other.
- ▶ Cooperatives focus on service to members allows collaboration at cost of growth.
- ▶ Common platform helps.
- ▶ Successful pilot in Flanders (BE) with CEDAN network

The TMF Team

Lukas

A very **engaged core team** (3FTE), working from ES, BE and DE.

- ▶ Coordinates and executes **IT-development**
- ▶ Maintenance of **eight Apple store and Android APP's**, and server / backend
- ▶ Provides **2nd level helpdesk** for cooperatives members
- ▶ Coordinates **development roadmap**
- ▶ Manages **In-car hardware** provision and support
- ▶ **Administration** tasks (invoicing, bookholding)
